

Floor Trunkings

Floor Trunkings are available in 3 different types.

- Under Floor Trunkings
- Flush Floor Trunkings
- Raised Floor Trunkings

Floor Trunkings are used in modern buildings to distribute electrical & ELV cables to different locations for a neat & professional installation.

Under Floor Trunkings are embedded to floor concrete and outlets are expose to the floor surface using the floor boxes.

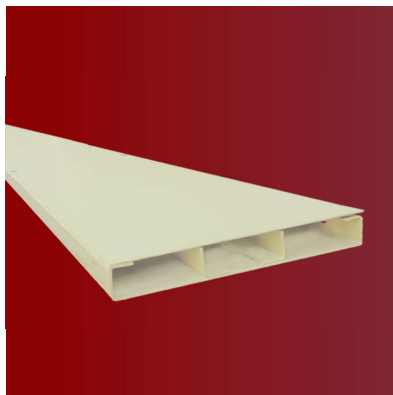

Flush Floor Trunkings are embedded to the concrete in a such a way top lid is expose to the floor surface. Floor boxes are fix on to the top lid to take electrical & ELV outlets.

Raised Floor Trunkings are used under the raised floors to install electrical & ELV cables

PRISMA Floor Trunkings are designed as per international standards to cater different industry requirements.

PRISMA Floor Trunkings are made out of Electro Galvanized sheet or HDGA with higher corrosion resistance.

Under Floor Trunkings
